Abstract (en)
[origin: WO2013004330A1] The present invention describes a portable data storage medium (2) which consists of an apparatus (4) for storing and processing data, an antenna (6) for transmitting energy and data, which is connected to the apparatus (4), and a plastic body which surrounds the apparatus (4) and the antenna (6), wherein the antenna (6) is produced by connecting warp and weft threads of an electrically conductive fabric (10).
