Abstract (en)
[origin: WO2013004412A1] The invention relates to an interface connector (1) for electrically connecting a plug (50) to a printed circuit board, comprising an interface housing (2) having a planar bearing surface (3) for placement on the printed circuit board, and provided with a plug connection (4) located on the rear of the bearing surface (3) for receiving the plug (50). The interface connector further comprises a functional space (5) surrounded by the bearing surface (3) for the feedthrough of at least one contact member (6, 6'), at least one first locking element (7) extending from the bearing surface (3), and at least one additional locking element (8, 8') extending from the functional space (5).
