Abstract (en)

[origin: EP2730195A1] The device (11) comprises a front-sided coupling unit (18) assigned to the front portion (12) and a side portion-sided coupling unit (23) assigned to the side portion (13), which are coupled with each other for fastening the front portion to the side portion. The side portion-sided coupling unit is a component of an additional portion (24) belonging to the device, which in turn is fastened at a frame by a fastening unit. The additional portion comprises a housing (25) made of plastic, in which the side portion-sided coupling unit is received.
