Abstract (en)  
[origin: EP2730521A1] The packaging (1) has a packaging foil (10) which is impermeable to water. Two drawstrings pass successively through loops in several arms (21). The drawstrings pass respectively through two orifices of a pair of diametrically opposed arms, so as to diametrically oppose two grasping areas (30,40). Main packaging goes from a flat position to three-dimensional (3D) position by pulling the drawstrings and exerting forces in opposite directions on the grasping areas, in which a base (20) and the arms of reinforcing element are in same plane. An independent claim is included for a suspension assembly.
