Abstract (en)
[origin: EP2730522A2] The object of this invention is a flower display container which also protects the plant during transport and handling before it is sold in shops. The flower display container is characterized in that it comprises an outer container (1); gripping means (5) for gripping the actual outer container; a supporting container receptacle (2) for supporting the flowers with the upper part thereof at least partially open and arranged inside said outer container, and fastening means (4) connecting the container receptacle with the outer container for supporting said container receptacle. Additional features of the invention include the fact that the container can be stacked during transport or displayed in business establishments.
