Abstract (en)

[origin: EP2730534A2] The device (1) has an accommodation unit (3) for accommodating a plug (2). A biased semicircular head-shaped fixing element (6) fixes the plug in the accommodation unit. A pre-stressed transmission element (9) is utilized for transmitting torque to the plug. The fixing element and the transmission element are protruded in the accommodation unit and utilized for aligning the plug in the accommodation unit, where diameter of the transmission element is greater than that of the fixing element.
