Abstract (en)  
[origin: WO2012172380A1] A bookbinding method in which after the initial phase (folding, assembling, sewing) of producing various forms of printed matter (books, note books, diaries, phone indexes, etc.), and after reinforcement with a bookbinding cold glue, the spine (joint) (5) is lined with a special tape (4), so that the glue does not penetrate in the interior of the printed matter (text-blocks) (figure 3). Furthermore, a bookmark (7) (figure 5a, 5b) is incorporated in the printed matter(text-blocks), perforation is effected, a paper case (8) (figure 6) is inserted, screen-printing is performed, an incision (1) on the cover for decoration is made (figure 1). Finally, a zipper (9) is arranged on the outer side by sewing (figure 7). This method can be used for bookbinding of books, diaries, notebooks, magazines and advertisement material (brochures).
