Abstract (en)

[origin: WO2013007374A1] The invention relates to a visually variable element, in particular a security element for a data medium, comprising a substrate (6) that has a section forming a motif and comprising a first sub-region (4), which is produced by means of intaglio printing, and a second sub-region (5), which is not produced by means of intaglio printing, wherein the two sub-regions (4, 5) are visually perceptible as respectively projecting and/or retreating, and wherein the visually perceptible and the haptically perceptible impressions of the first sub-region (4) correspond and the visually perceptible and the haptically perceptible impressions of the second partial area (5) do not correspond.
