Abstract (en)

[origin: WO2013010972A1] The invention relates to a labeling device, comprising a modular base carrier (2) designed to be arranged on the container (15) and an attachment element (9) for individually marking a container (15) for drinking liquids, which attachment element has a fastening device (9b). The attachment element (9) is designed as a closure for a container opening (17) of the container (15), and the fastening device (9b) is designed in such a way that the attachment element (9) can be detachably connected in a form-closed and/or force-closed manner to the container (15) in a first position and to the base carrier (2) in a second position.
