Abstract (en)

[origin: WO2013006927A1] Container-closure system, particularly intended for hotfill or hot filling, and which is closable by means of a releasable closure (2, 6, 8, 11) which is provided at its top with a top surface. Wherein the closure (2, 6, 8, 11) is provided with an aperture as a pressure compensation means (3) with small dimensions, which is provided externally as a passage between the exterior of the container and the interior thereof. It is further provided with an internal vacuum limiter that is arranged in the interior of the closure in such a way that said pressure compensation means (3) is separated from the interior of the container, wherein it acts as a vacuum limiter of the interior of the container in regard of said opening (3); and method therefor.
