Abstract (en)

[origin: WO2013010278A1] A yarn sensor (5) is assigned to a loom (1). The yarn sensor (5) comprises a measuring region (51) for measuring values of at least one parameter of a weft thread (91) to be inserted. An apparatus (10) is provided for removing the weft thread (91) from the measuring region (51) and for reinserting the weft thread (91) into the measuring region (51). The yarn sensor (5) can be balanced to null or adjusted without the weft thread (91) as a result of the invention.
