Abstract (en)
[origin: WO2013010723A1] The invention relates to a pipe support (1), in which a pipe (4) can be fastened to a support plate (2). The problem on which the invention is based is to connect the pipe (4) to the support plate (2) in a non-positive manner, without thermal connecting processes. To this end, the pipe support (1) has a spline sleeve (8), by way of which the pipe (4) can be wedged in an opening (3) of the support plate (2).
