Abstract (en)
[origin: EP2733193A1] A flavorant-carrying low adsorbent particle comprising a low adsorbent core particle having a BET specific surface area of less than 700 m²/g, and a flavor-generating medium carried on the surface of the low adsorbent core particle and including a flavorant and a flavorant-holding material holding the flavorant, wherein the flavorant-holding material is present in an amount of 5 to 20% with respect to a total weight of the flavorant-carrying low adsorbent particle, and the flavorant is present in an amount of 10 to 50% with respect to a weight of the flavorant-holding material.
