Abstract (en)

The system (1) has an innermost heat insulating layer (16) that is provided with an internal porosity on a substrate (4). An outermost heat insulating layer (19) with an external porosity is provided on the innermost heat insulating layer. The outermost heat insulating layer has an absolute higher porosity than the innermost heat insulating layer. Several holes (20) and line-shaped depressions (21) are extended from the outer surface (22) into the depth of the outermost heat insulating layer and innermost heat insulating layer.

Abstract (de)

Durch die Verwendung einer äußeren keramischen Schicht (19) mit einer höheren Porosität und die Einbringung von Löchern und Vertiefungen in die äußerste porösere keramische Wärmedämmenschicht werden in einfacher Art und Weise Laufschichten hergestellt, die gleiche oder verbesserte Eigenschaften aufweisen und günstiger sind.
