Abstract (en)

[origin: EP2733265A1] The cooling system (3) has a hollow structural element (2) designed as container and a heat exchanger (31). The primary cooling circuit (3-1) and a secondary cooling circuit (3-2) is thermally coupled through a heat exchanger. The coolant storage units (61,63,65) arranged in the hollow structural element are provided for retaining the coolant (39) e.g. soft water of secondary cooling circuit.
