Abstract (en)
[origin: EP2733285A1] The station has an antenna tower (15), and an accessible container comprising a base frame (1) and a cover frame (2). An edge stand (3) connects the frames with one another. The frames are connected with the stand by a frame-like stiffener (4) for forming a supporting frame for the tower. The supporting frame has a hollow foot profile (9) screwed to a lower side of the base frame, where the profile runs diagonally over frame edges. Sections of the profile projecting over a frame side piece are screwed with a base plate (19) by a fastening anchor, where the plate is made from concrete.
