Abstract (en)

[origin: EP2733289A2] This invention relates to restrictor and a kit of parts for assembling a restrictor. In particular the restrictor is a cable restrictor suited to limiting the opening movement of a movable panel relative to its surrounding frame. The restrictor (10) has a first fixing part (24) and a second fixing part (30) interconnected by a flexible cable (16), and a first mounting part (26) and a second mounting part (32) by which it may be mounted adjacent to the panel. The first fixing part (24) is releasably connectable to the first mounting part (26) and the second fixing part (30) is connected to the second mounting part (32). The first and second fixing parts are interchangeable and may be identically formed. There is also provided a kit of parts for assembling into a cable restrictor.
