Abstract (en)

[origin: EP2733298A2] The shadowing unit has a drive (2) which is connected to the shading element (1). An accumulator (3) is provided to supply power to the drive. A temperature sensor (4) is provided to measure the temperature of the accumulator. A controller (5) is adapted to control the drive in dependence on temperature of the accumulator. Independent claims are included for the following: (1) closure element; (2) group of shadowing units; and (3) method for the shadowing building aperture.
