Abstract (en)  
[origin: WO2013013970A1] The invention relates to a hair shaping device having a housing (1), having two shaping parts connected to each other by a joint for shaping hair (4) and having at least one cooling element (3). At least one of the shaping parts comprises at least one heating element (2) for warming the hair. The cooling element (3) is allocated to the at least one shaping part and is suitable for cooling the hair which is warmed on the heating element (2). The cooling element (3) is rotatably attached to the housing (1).
