Abstract (en)  
[origin: WO2013012938A1] One variation of a preferred health meter includes: a housing configured to be worn by a user; a glucose meter coupled to the housing; a pedometer coupled to the housing; a processor arranged within the housing and configured to generate a directive for a user action in response to a measured glucose level and an output of the pedometer; and a display arranged within the housing and configured to display the directive for the user.
