Abstract (en)

[origin: WO2013014057A1] The present invention relates to the use of a composition comprising at least one permeabilized nucleus of a first cell, or at least one permeabilized first cell comprising said nucleus and an extract of female germinal cells, or eggs, of a multicellular organism, said eggs being blocked in the metaphase II of meiosis, said extract comprising EGTA, for carrying out a method for obtaining pluripotent stem cells, or tissues derived from said pluripotent stem cells, or of cloning, provided that said process is not for cloning human beings.
