Abstract (en)
[origin: WO2013010678A1] The invention relates to clothing for a paper machine with two or more endless belts, each of which is formed from a film-like web (10, 20, 30), joined along a splice (11, 21, 31) to form a belt continuous in the direction of rotation of the clothing, the endless belts being connected to one another at the side edges (12, 13, 22, 23) such that the splices (11, 21, 31) of two endless belts connected to one another are arranged offset relative to one other with regard to the direction of rotation of the clothing (1).
