Abstract (en)

[origin: EP2735679A2] Adjustable hinge to hinge a mobile element (11) with respect to a fixed element (12), comprising a first hinging unit (13) and a second hinging unit (15), configured to be rotatably coupled with each other by means of a pivoting member (44) along a hinging axis (Z), and one or more adjustment mechanisms configured to adjust the reciprocal position of the two hinging units (13, 15). At least one of the adjustment mechanisms comprises a command member associated to the pivoting member (44) in order to make it selectively rotate with respect to a pivoting axis associated to the hinging axis (Z).
