Abstract (en)  
[origin: EP2735687A1] The window or door or facade element (1) has a frame, which has multiple frame profiles made of plastic. A width of a groove is measured such that the diffusion of water vapor through a blocking element (30) is enabled in a non-sealing manner. A locking bolt is formed opposite to an adhesive layer (31) in a rebate area (17) of a blade frame profile (6).
