Abstract (en)

[origin: EP2735689A2] The device (100) has a vertical section (120) and a horizontal section (110) arranged in installation condition. A region of the device turned toward inner surfaces (21, 22) of a latch profile (20) in the installation condition includes a seal element (150). One of the inner surfaces of the latch profile turned toward the region of the device includes an outer flange (111) that extends parallel to a base, and inner surfaces of the latch profile runs perpendicular to a post profile. An upper flange (112) runs parallel to the base. An independent claim is also included for a post-controller-profile arrangement for a facade.
