Abstract (en)

The outlet has two side strips (1.1, 1.2) forming an exhaust opening (8), and a nozzle (6) movably arranged in the exhaust opening. A spacer (2) is arranged between the side strips, where the nozzle is arranged at a bottom part (11) of a carrying shell (3). Side walls (4.1, 4.2) of the carrying shell are engaged with wedging strips (5.1, 5.2), which laterally protrude outward the side strips. Lateral cover strips protrude from free ends of the side strips to cover an aperture in a ceiling, into which the air outlet is inserted.

Abstract (de)

Bei einem Luftauslass mit zumindest zwei Seitenstreifen (1.1, 1.2), die eine Auslassöffnung (8) ausbilden, soll in der Auslassöffnung (8) zumindest eine Düse (6) angeordnet sein.
