Abstract (en)

A signage assembly comprising: a first signage component (5) defining a first surface and displaying a first sign and viewable from an intended viewing position, a second signage component (6) defining a second surface and displaying a second sign, wherein the second signage component (6) is arranged relative to the first signage component (5) such that the first and second surfaces are non-parallel, and the second sign comprises a manipulation of an original image, the manipulation being arranged such that, when the signage assembly is viewed from the intended viewing position, the original image appears in a plane extending at an angle to the second surface.
