Abstract (en)  
[origin: WO2013014093A1] The invention relates to an accessory (1) for an electric appliance for styling hair, said accessory being adaptable to an electric airflow hairdressing appliance (100) and comprising: a hollow sleeve (10, 20) having a longitudinal axis (L) that can be mounted on the hairdressing appliance (100), said sleeve comprising a set of silk bristles (11, 11', ' 11 ", 21) and a set of through-openings (12, 22) for the circulation of the airflow. Said sleeve also comprises a first hollow body (10) provided with a first set of silk bristles (11, 11', 11") protruding from said first body (10) and a first set of through-openings (12) for the circulation of the airflow, and a second hollow body (20) provided with a second set of silk bristles (21) protruding from said second body (20) and a second set of through-openings (22) for the circulation of the airflow. The second body (20) is different from the first body and has a part (24, 25) that can be fixed at least partially to the first body (10) in a detachable manner. The first body (10) has an outer cylindrical surface, the axis of symmetry (S) thereof being coincident with the longitudinal axis (L) of the accessory.
