Abstract (en)
[origin: WO2013013702A1] A suction apparatus that is suitable for suctioning ashes is proposed, comprising a uniform suctioned material container unit (12, 94), in which a suctioned material space (18, 102) is arranged, a filter unit (14, 96, 142), supported detachably on the suctioned material container unit (12, 94), with a filter holder (62, 106, 144) and at least one filter (64, 112, 116, 146), and a suction head unit (16, 98), on which a motor device (70) is arranged and which is supported detachably on the filter unit and/or on the suctioned material container unit, the filter unit being detachable with respect to the suction head unit.
