Abstract (en)

[origin: WO2013017375A1] The present disclosure relates to a laminated sheet for use in a wall or floor covering (100) in wet rooms. The laminated sheet comprises a porous mounting layer (1), adapted for being adhered to a support surface by means of a glue, and a polyolefin barrier film (3), effectively impermeable to water vapor. The laminated sheet further comprises a first joint layer (2) for joining the mounting layer (1) to the barrier film (2), the first joint layer (2) being melt coated onto the mounting layer, such that an integrated sheet (10) is formed, which presents a first face (11), consisting essentially of said mounting layer (1) and a second face (22) consisting essentially of said first joint layer (2). The second face (22) of the integrated sheet (10) is fused to the barrier film.
