Abstract (en)
[origin: WO2013019753A1] A carton for packaging one or more articles includes a first side panel and a first base panel hingedly connected by a fold line. The carton further includes at least one article retention structure for engaging a lower portion of an article. The at least one article retention structure has at least one retention tab (42, 44) struck from, and hinged-ly connected to, the first side panel and the first base panel. At least a portion of the at least one retention tab is folded into overlapping relationship with the first side panel and first base panel. The carton further includes at least one locking tab (52) hingedly connected to one of said first side panel and the first base panel. The at least one locking tab has a locking edge in engagement with a portion of the at least one retention tab.
