Abstract (en)  
[origin: EP2738328A2] The fitting (3) has two functional elements (4-6) interconnected by connectors (7, 8). Connecting points (9) are provided for positive connection of a driving rod portion with the functional elements such that corresponding toothings of the rod portion and the functional elements are arranged at the connecting points. The connector comprises a cover rail for covering the rod portion, where the cover rail comprises a latch unit for supporting in a fitting groove (10). The rod portion and the cover rail are connected by a holding unit that is breakable with small energy expenditure.
