Abstract (en)
[origin: EP2738341A2] The system has a roller blind shaft, two bearing elements (1) for roller blind shaft, a pair of guide rails (2) for roller blind and two inlet elements (3) for insertion of roller blind in the guide rails. A building-side portion of guide rails is connected with an opening portion and an outer side facing portion of the guide rails is connected with the building-side portion. The inlet elements are constructed in two portions and removable portions of inlet elements are mounted in roller blind. The bearing elements are fastened to the roller blind shaft in the region of guide rails.
