Abstract (en)
A screening arrangement (1) for a roof window comprising a frame (2) with a top piece (21), a bottom piece (22) and two side pieces (23, 24), the screening arrangement (1) comprising a bottom element (7), and two side rails (8, 9) comprising a longitudinal direction (L) and a width direction (W), the bottom element (7) being movable with respect to the two side rails (8, 9) between a first non-screening position and a second screening position by means of a drive means comprising a first transmission means (711, 712, 713) arranged in said bottom element (7), and a second transmission means (810, 910) and at least one electrical guide (811, 812; 911, 912) arranged in each of the two side rails (8, 9), the second transmission means (810, 910) and the at least one electrical guide (811, 812; 911, 912) extending substantially in the longitudinal direction (L) of at least one of the side rails (8, 9), and the second transmission means (810, 910) being arranged offset with respect to the at least one electrical guide (811, 812; 911, 912) in a depth direction (D) extending substantially perpendicular to both the longitudinal direction (L) and the width direction (W).
