Abstract (en)  
[origin: EP2738499A2] The refrigerator (100) has a container (104) arranged in an interior space (102) of the refrigerator. The container is provided for receiving cooled material. The container has a base body with a guide. The doors (106,108) of the container are mounted in the guide in a sliding manner. A retaining element is fastened to the base body. The retaining element closes an end of the guide. The base body, retaining element and door are made from plastic.
