Abstract (en)

Satellite television kit, particularly for camper vans, caravans, trucks, articulated trucks and similar vehicles, which comprises means (2) for moving at least one satellite antenna (3) with motorized pointing, for selective modification of its orientation. The antenna (3) is controlled by a satellite receiver (4), for decoding the signal sent by a satellite, and to be able to consequently view it on a satellite television set (5) that can be connected to the receiver (4), which in turn is provided with a user interface (6) for the selection, by a user, of the channel to be displayed on the television screen (5). The receiver (4) is associated with a unit (7) for controlling the movement means (2) through an HDMI connection (8), in order to transfer, to the control unit (7), the request to point to a predefined satellite, as a function of a choice made by the user by way of the user interface (6) of the receiver (4).
