Abstract (en)

[origin: US2013032503A1] A containment package for presaturated wiper sheets including a substantially liquid and vapor impermeable body having an interior adapted to receive and store a plurality of wiper sheets presaturated with a solution subject to evaporation. The body includes an access opening adapted for insertion and withdrawal of the wiper sheets through the access opening. At least a first sealing element defining a magnet is supported on a first support structure at a position outside of the interior. At least a second sealing element with magnetic attraction to the first sealing element is disposed on a second support structure at a position outside of the interior.
