Abstract (en)

[origin: WO2013017345A1] The invention relates to a glazing unit, in particular an insulating glazing unit, comprising at least a first (5) and a second (5) glass sheet joined together via at least one spacer (8) that keeps them a certain distance apart from each other and, between said at least two glass sheets, at least one internal space (4) closed by a peripheral seal (101) placed on the periphery of the glass sheets, around said internal space, the seal having a U-shaped cross section comprising a first flange (1011) securely fastened to the first glass sheet and a second flange (1012) securely fastened to the second glass sheet. According to the invention, the first flange is securely fastened in a first recess (521) produced in the edge face of the first glass sheet.
