Abstract (en)

[origin: WO2013017441A1] The invention relates to a method for drying a fluid film (F) applied to a substrate surface of a substrate (3) and containing a vaporizable liquid, with the following steps: transporting the substrate (3) on a transporting surface (6) of a transporting device (5) along a transporting direction (T) through a drying device (7), vaporizing the liquid by means of a heat source (13) having a heating surface (G), wherein the heating surface (G) is arranged at a distance (dG) of 0.1 mm to 5.0 mm opposite the substrate surface, and removing the vaporized liquid in the direction of the heat source (13).
