Abstract (en)
[origin: EP2740381A1] An unfolding buckle has strips hinged to each other between a closed position and an open position. A strip (2) is fastened to a first bracelet strand. A bottom strip (4) has a loop at end and formed with a passage for a second bracelet strand. The bottom strip has a lug inserted in hole in bracelet strand to define an anchorage of bracelet to clasp. The loop has loop sections aligned along bracelet longitudinal direction, and cooperated with lug to ensure the assembly to loop and define a predefined position of anchorage associated with predefined usable length of bracelet. An independent claim is included for a wristwatch.
