Abstract (en)
[origin: EP2740383A2] The hair dryer (1) has a blower for generating a hot air flow (6) and a removable attachment (5), where the hot air flow runs into the interior (25) of the attachment for drying the hair and is blown out through the attachment. The attachment is designed partially in multi-walled, particularly double-walled manner with an inner wall and an outer wall. An intermediate space (26) of the attachment surrounds the inner wall and the outer wall. The outer wall is formed of foamed plastic.
