Abstract (en)  
[origin: EP2740645A1] The system has an actuation device (8) i.e. hydraulic actuation device, for a control unit (3) i.e. lever, where the actuation device includes a removable connection unit i.e. fastener, for removable connection to a railway vehicle e.g. good transport railway vehicle. The connection unit includes a gripping part for the control unit. The actuation device is ready to move the connection unit for removable connection at the gripping part or each control unit with regard to the connection unit so as to actuate the control unit by displacement of the gripping part.
