Abstract (en)
A flashing construction for forming a weatherproof seal at the junction of a wall and a roof comprising a first layer (14) formed from a sheet of deformable weatherproof material, and a second layer (12) formed from a thermally insulating material, said first layer (14) defining an outer layer of the flashing construction and at least a portion of said first layer being bonded to the second layer (12), wherein said first layer (14) extends beyond said second layer (12) at an upper edge (16) thereof to enable said first layer (14) to be anchored to a wall.
