Abstract (en)

[origin: EP2740868A1] The locking strip fitting (2) comprises corner deflection unit that is formed for a corner area of window and door. The holding units (21,25) are operatively connected to each other in an area defined by the corner angle extending locking strip (51,52) by a pivot bearing (23) for rotation. The two support elements (30,31) are fixed on base (13) by pivot mountings (28,29) which are articulated on the holding units. Each support element is fixed to locking strips by connection unit (64).
