Abstract (en)

[origin: EP2740872A2] The corner bearing has a wing-side fitting portion (6) is provided with a handle assembly (7) that is connected to a base portion (9) for connection with a wing (2) having a support portion (10). An actuating unit (12) adjusts the height of the wing. An actuator unit (13) adjusts the support portion relative to the base portion through adjusting screws (15,16), which is formed transversely to the plane of the wing, such that parallel axes of rotation of actuator units (12,13) are accessible to rotation from the same side of wing-side fitting portion.
