Abstract (en)

[origin: EP2741013A1] The appliance (1) has a fan (2) which is provided in the first and second zones (11-14). An adjusting device (21) is adapted in first mode of operation, when first air flow rate (22) of first zone and second air flow rate (25) of second zone is different. The constant speed of the fan in first and second mode of operation is regulated according to air flow rate (22',25') that are different from each other. The performance of the fan is regulated in first and second mode of operation, when first and third air flow rate is equal from fourth air flow rate.
