Abstract (en)

[origin: EP2741014A2] The appliance (1) has housing (4) that is provided with a cooking chamber (2) that is closed through a door (3). A guide device (9) is provided with a guide slot (10) with which the door is coupled, when door moved to the open state in a receiving space (8) in the housing is countersunk. The guide device adjusts the height position of the door relative to the housing. An actuating element (21) is moved relative to a boundary wall (12).
