Abstract (en)
[origin: WO2013020833A2] A capsule forming apparatus comprising a first support in which a plurality of first outputs configured to output a first capsule material are located; a second support in which a plurality of second outputs configured to output a second capsule material are located; and a second capsule material feed region between the first and second supports from which the second capsule material can enter the second outputs. A method of forming capsules is also described.
