Abstract (en)

[origin: WO2013020977A1] The present invention relates to a device for coating electrically conductive wires, comprising a plurality of units in the following arrangement: a unit (1) for feeding the wires, a unit (2) for the pretreatment of the wires, a unit (5) for applying a coating medium, a unit (6) for the aftertreatment of the coated wires, and a unit (8) for winding up the coated wire.
