Abstract (en)  
[origin: WO2013024218A1] The present invention relates to an exhaust cone for an aircraft turbojet engine comprising a front part having a front end fitted with a connecting flange (9a) for connection to a turbojet engine outlet and/or a rear end fitted with a connecting flange (9b) for connection to a rear part of the exhaust cone, said front part also being equipped with at least one noise attenuation structure comprising a corresponding external skin (52), characterized in that the external skin straddles at least part of the corresponding upstream or downstream connecting flange and is assembled therewith.
